Beyond our expert survey and mapping services, energy companies rely on **USM** as their trusted partner for multi-disciplinary civil engineering services.

Since 2013, USM has played a crucial role in developing important energy infrastructure, with **expert planning, design, and construction services for energy generation, transmission, and distribution facilities, including conventional and renewable sources.**

Working with some of the industry's leading companies — such as Enbridge, Plains Pipeline, Energy Transfer, ONEOK, Magellan, and more — USM's experienced staff are ready to safely and efficiently support your team.

From start to finish, USM is there to help you create value and overcome any project challenge. How can USM help you?
